Green Rehabilitation Centre

Stress Relief In A Dense City

Fisherman Bend, Melbourne - Wirraway

Yiheng Fu
UNSW-Master of Landscape Architecture

Melbourne's Future Park 2050 will be focused on human health to construct as the green infrastructure. Melbourne might occur the issues relate to climate change and growing population until 2050. Corresponding to the high density of housing, it would cause negative impacts on the psychological health of human. In my perspective, the technology will have progress annually, but it also causes more life pressure to human. The main users will be workers and students because they will usually suffer competitions in their fields. It is essential to build more green parks in the urban area. People request more parks because of the increased number of buildings, which will feel depressive. The green park helps to minimize people's stressful and adjust their psychology. Besides, the future park will also consider renewable energy to maintain the ecosystem, which aims to avoid natural disasters. Park will provide various recreations and equipment for users to have the unique experience to adjust their psychology.

Fisherman Bend is an important area to impact Melbourne. The new urban green park will access to Wirraway precinct. The surrounding of it fills with architecture and it is encompassed by them. The park will concentrate the psychological health to design, it is similar to the rehabilitation centre which helps people to recover their issues. People mainly do exercise and see green elements to overcome their issues. The big concept relates to the human body organs and uses specific features to re-design the selected site. The programs of the new park will refer to the human body system and collaborate with precedents' features to mix, each organ represents the different program. People will experience each program to refresh their mind to be positive.

In short, the green park plays the role of a natural rehabilitation centre aims to treat people's psychology and help them to return a positive attitude.

Fisherman Bend overview

Wirraway Precinct Masterplan

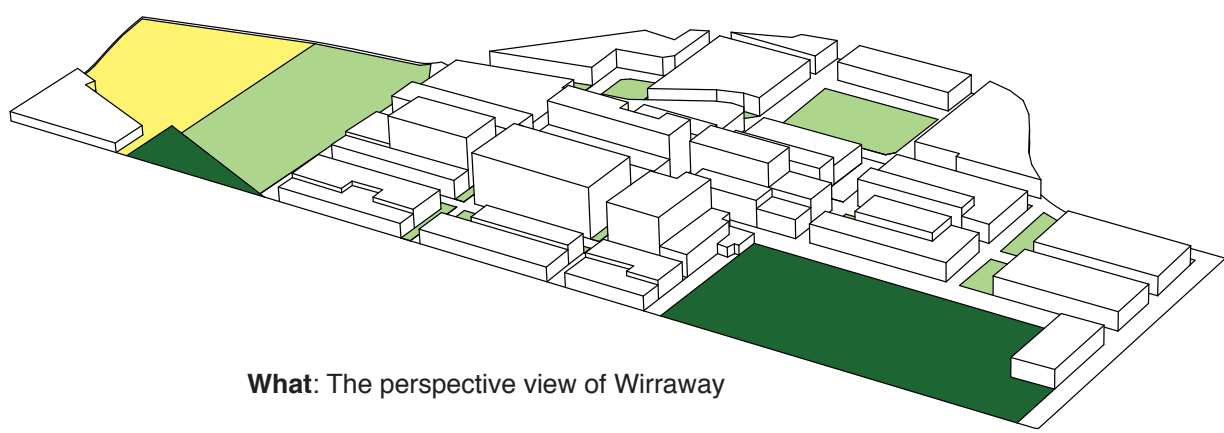

Investigation area
